OAG Aerospace Competition 2026

Participants guide

About the Competition

The OAG Aerospace Challenge 2026 is a student-led competition that aims to bridge aerospace engineering and artificial intelligence. Participants are invited to explore real engineering challenges and demonstrate how AI can can be usedto support analysis, decision-making, and optimization

Competition Objective

The objective of this challenge is not to fully solve a problem, but to demonstrate how Artificial Intelligence can be effectively integrated into aerospace engineering processes

Competition Tracks

- Aerodaynamics & structure
- Space control systems
- propulsion

Competition Format

Participants are required to select a problem within their chosen track and demonstrate how AI can be used to analyse, support, or improve the solution

Deliverables

- 5–7 presentation slides
- 5-minute presentation
- Clear explanation of:
  - Problem definition
  - Engineering reasoning
  - AI integration

Eligibility Requirements

- Teams must consist of 2–4 members
- Each team must include **at least one** Aerospace Engineering student
- Students from related disciplines are allowed

Competition Timeline

Day 1: Ideation & Development

- Teams meet and begin working on their selected idea
- Initial problem definition and AI integration approach
- Feedback session with mentors to guide and refine ideas

Day 2: Finalization & Presentation

- Teams continue developing and refining their solutions
- Final preparation of presentations
- Project presentations in front of judges
- Announcement of winners

Registration Opens: **April 11, 2026**

Registration Deadline: **April 17, 2026**

Competition Days: **April 19& 20, 2026**

Evaluation Criteria

- Problem Definition (20%)
- AI Integration (30%)
- Engineering Logic (25%)
- Creativity (15%)
- Presentation (10%)

For more detail, see the rubric PDF link

Rules and Guidelines

- AI tools are allowed (e.g., ChatGPT, Python, MATLAB)
- Teams are not required to build full simulations
- Focus on concept, reasoning, and clarity
- All submissions must be original

Important Notes

Selected ideas are subject to review. Teams are expected to attend and present on the competition day. Failure to present may result in disqualification
